WEIGHT MANAGEMENT

At Nie's Pharmacy, our weight management solutions combine the highest-quality compounded medications with personalized care. We provide a full spectrum of therapies—from innovative GLP-1 receptor agonists and sublingual suspensions to traditional medications, injectables, and supportive topicals. Each product is carefully developed to promote safe, effective weight loss, improve metabolic health, and enhance overall patient wellbeing. With customizable dosing options, companion creams, and supportive therapies, our catalog empowers patients to achieve sustainable results and long-term wellness.

WEIGHT MANAGEMENT PRODUCT OFFERINGS

PRODUCT	KNOWN USES	TYPE	STRENGTH	VOLUME
B6 RDT	An RDT (Rapid Dissolve Tablet) is primarily used in weight loss protocols to enhance metabolism, reduce water retention, boost energy and mood and helps alleviate GLP-1 medication side effects.	RDT	25 mg	10 Tablets
B6 RDT	An RDT (Rapid Dissolve Tablet) is primarily used in weight loss protocols to enhance metabolism, reduce water retention, boost energy and mood and helps alleviate GLP-1 medication side effects.	RDT	25 mg	30 Tablets
METFORMIN ER	May promote weight loss by reducing appetite, improving insulin sensitivity, and decreasing glucose production in the liver.	Tablet	500 mg	Per Tablet
MIC ULTRABURN MIC / B-COMPLEX (B1 / B2 / B3 / B5 / B6) / B12 / LIDO / CARN	support fat metabolism, boost energy levels, and enhance liver function.	Injectable	25 / 50 / 50 / 5 / 2.5 / 25 / 5 / 5 / 0.1 / 10 / 50 mg per mL	5 mL
MIC ULTRABURN MIC / B-COMPLEX (B1 / B2 / B3 / B5 / B6) / B12 / LIDO / CARN	support fat metabolism, boost energy levels, and enhance liver function.	Injectable	25 / 50 / 50 / 5 / 2.5 / 25 / 5 / 5 / 0.1 / 10 / 50 mg per mL	10 mL
MIC ULTRABURN MIC / B-COMPLEX (B1 / B2 / B3 / B5 / B6) / B12 / LIDO / CARN	support fat metabolism, boost energy levels, and enhance liver function.	Injectable	25 / 50 / 50 / 5 / 2.5 / 25 / 5 / 5 / 0.1 / 10 / 50 mg per mL	15 mL
MIC ULTRABURN MIC / B-COMPLEX (B1 / B2 / B3 / B5 / B6) / B12 / LIDO / CARN	support fat metabolism, boost energy levels, and enhance liver function.	Injectable	25 / 50 / 50 / 5 / 2.5 / 25 / 5 / 5 / 0.1 / 10 / 50 mg per mL	30 mL
NALTREXONE	Aids weight loss, reduces cravings, improves mood, and helps manage addiction or smoking cessation.	Capsule	All	each
NICOTINE	appetite suppressant and metabolism booster.	Lozenge	4 mg	#81
PHENTERMINE	Reduces appetite, curbs cravings, promotes satiety, aids weight loss.	Breakable Tablet	37.5 mg	each
PHENTERMINE / TOPIRAMATE	Suppresses appetite, reduces hunger, enhances satiety.	Capsule	All	per Capsule
SEMAGLUTIDE	GLP-1 receptor agonists improve blood sugar control, promote weight loss, reduce appetite, lower cardiovascular risk.	Injectable	5 mg / mL	various
SEMAGLUTIDE / LEVOCARNITINE	Suppresses appetite and enhances fat metabolism. Pairing Levocarnitine with Semaglutide enhances fat metabolism, preserves energy levels, and improves exercise endurance.	Injectable	2.5mg / 2mg / mL	2 mL

PRODUCT	KNOWN USES	TYPE	STRENGTH	VOLUME
SEMAGLUTIDE / LEVOCARNITINE	Suppresses appetite and enhances fat metabolism. Pairing Levocarnitine with Semaglutide enhances fat metabolism, preserves energy levels, and improves exercise endurance.	Injectable	2.5mg / 2mg / mL	3 mL
SEMAGLUTIDE / LEVOCARNITINE	Suppresses appetite and enhances fat metabolism. Pairing Levocarnitine with Semaglutide enhances fat metabolism, preserves energy levels, and improves exercise endurance.	Injectable	2.5mg / 2mg / mL	5 mL
SEMAGLUTIDE / NIACINAMIDE	Suppresses appetite, supports cellular energy production, boosts metabolism, and offsets potential side effects like fatigue.	Injectable	2.5mg / 2mg / mL	2 mL
SEMAGLUTIDE / NIACINAMIDE	Suppresses appetite, supports cellular energy production, boosts metabolism, and offsets potential side effects like fatigue.	Injectable	2.5mg / 2mg / mL	3 mL
SEMAGLUTIDE / NIACINAMIDE	Suppresses appetite, supports cellular energy production, boosts metabolism, and offsets potential side effects like fatigue.	Injectable	2.5 mg / 2 mg / mL	5 mL
TESOFENSIN	Suppresses appetite, boosts metabolism, and increases resting energy expenditure	Capsule	500 mcg	each
TIRZEPATIDE	Suppresses appetite, delays gastric emptying, regulates blood sugar	Injectable	15 mg / mL	4.5
TIRZEPATIDE / LEVOCARNITINE	Suppresses appetite, slows metabolism and regulates blood sugar. Pairing Levocarnitine with Tirzepatide enhances fat metabolism and boost energy levels.	Injectable	17 mg / 3 mg / mL	2 mL
TIRZEPATIDE / LEVOCARNITINE	Suppresses appetite, slows metabolism and regulates blood sugar. Pairing Levocarnitine with Tirzepatide enhances fat metabolism and boost energy levels.	Injectable	17 mg / 3 mg / mL	3 mL
TIRZEPATIDE / LEVOCARNITINE	Suppresses appetite, slows metabolism and regulates blood sugar. Pairing Levocarnitine with Tirzepatide enhances fat metabolism and boost energy levels.	Injectable	17 mg / 3 mg / mL	4 mL
TIRZEPATIDE / LEVOCARNITINE	Suppresses appetite, slows metabolism and regulates blood sugar. Pairing Levocarnitine with Tirzepatide enhances fat metabolism and boost energy levels.	Injectable	17 mg / 3 mg / mL	5 mL
TIRZEPATIDE / NIACINAMIDE	Suppresses appetite, regulates blood sugar, and supports cellular metabolism.	Injectable	17 mg / 2 mg / mL	2 mL
TIRZEPATIDE / NIACINAMIDE	Suppresses appetite, regulates blood sugar, and supports cellular metabolism.	Injectable	17 mg / 2 mg / mL	3 mL
TIRZEPATIDE / NIACINAMIDE	Suppresses appetite, regulates blood sugar, and supports cellular metabolism.	Injectable	17 mg / 2 mg / mL	4 mL
TIRZEPATIDE / NIACINAMIDE	Suppresses appetite, regulates blood sugar, and supports cellular metabolism	Injectable	17 mg / 2 mg / mL	5 mL

MEN'S HEALTH

Our Men's Health offerings focus on safe, effective solutions for erectile dysfunction (ED) and overall performance. We provide a range of PDE5 inhibitors—including Sildenafil, Tadalafil, and Oxytocin—designed to enhance confidence, intimacy, and quality of life, with options for both rapid and long-lasting results.

MEN'S HEALTH PRODUCT OFFERINGS

PRODUCT	KNOWN USES	TYPE	STRENGTH	VOLUME
BIMIX	Bimix is an injectable medication for erectile dysfunction, combining phentolamine and papaverine. Phentolamine relaxes blood vessels, while papaverine promotes blood flow, facilitating erections. It is typically prescribed when oral ED medications are ineffective. It is important to use bimix under medical supervision to ensure safety and proper dosing.	Injectable	All	5 mL
DEXTROMETHORPHAN HBR	Helps prevent premature ejaculation.	Capsule	100 mg	each
MAGIC CREAM: TADALAFIL / PT-141	Tadalafil relaxes muscles and increases blood flow to the penis and PT-141 (Bremelanotide) activates melanocortin receptors in the hypothalamus, which controls sexual motivation and desire.	Cream	25 mg / 1 mg / g	15 g
OXYTOCIN	Oxytocin is used to reduce performance anxiety, stress, and psychological barriers to arousal. By interacting with dopamine pathways, it helps men relax and enhances natural sexual desire.	Intranasal	40 IU / 0.1 mL	12 mL
OXYTOCIN / TADALAFIL	Tadalafil relaxes blood vessels and increases blood flow to the penis, resulting in firmer, longer-lasting erections. Oxytocin is used to reduce performance anxiety, stress, and psychological barriers to arousal. By interacting with dopamine pathways, it helps men relax and enhances natural sexual desire.	Troche	All	per Troche
OXYTOCIN / TADALAFIL (RAPID DISSOLVE)	Tadalafil relaxes blood vessels and increases blood flow to the penis, resulting in firmer, longer-lasting erections. Oxytocin is used to reduce performance anxiety, stress, and psychological barriers to arousal. By interacting with dopamine pathways, it helps men relax and enhances natural sexual desire.	Tablet	100 Units / 5 mg	each
OXYTOCIN / TADALAFIL (RAPID DISSOLVE)	Tadalafil relaxes blood vessels and increases blood flow to the penis, resulting in firmer, longer-lasting erections. Oxytocin is used to reduce performance anxiety, stress, and psychological barriers to arousal. By interacting with dopamine pathways, it helps men relax and enhances natural sexual desire.	Troche	Below 125 / 100	each
OXYTOCIN / SILDENAFIL	Sildenafil relaxes smooth muscles in the penis. By allowing these muscles to relax, it increases blood flow to the area, making it easier to achieve and maintain an erection. Oxytocin is used to reduce performance anxiety, stress, and psychological barriers to arousal. By interacting with dopamine pathways, it helps men relax and enhances natural sexual desire.	Tablet	125 IU / 100 mg	each
PERFORMANCE CREAM: TADALAFIL / L-ARGININE / PENTOXIFYLLINE	works by enhancing blood flow, hormone balance, and nerve sensitivity in the genital area.	Cream	All	15 g
SILDENAFIL	Sildenafil relaxes smooth muscles in the penis. By allowing these muscles to relax, it increases blood flow to the area, making it easier to achieve and maintain an erection.	Gel / Cream	0.02	15 g
SILDENAFIL	Sildenafil relaxes smooth muscles in the penis. By allowing these muscles to relax, it increases blood flow to the area, making it easier to achieve and maintain an erection.	Troche / RDT	All	each
SILDENAFIL	Sildenafil relaxes smooth muscles in the penis. By allowing these muscles to relax, it increases blood flow to the area, making it easier to achieve and maintain an erection.	Capsule	All	each
SILDENAFIL / APOMORPHINE	Combining Tadalafil and Apomorphine may improve erectile function through dual mechanisms, enhancing both blood flow and psychological stimulation for better sexual response. Apomorphine helps with erectile dysfunction by activating dopamine receptors in the brain, which enhances libido and facilitates erections.	Troche / RDT	All	each

PRODUCT	KNOWN USES	TYPE	STRENGTH	VOLUME
SILDENAFIL / APOMORPHINE / OXYTOCIN	Combining Tadalafil and Apomorphine may improve erectile function through dual mechanisms, enhancing both blood flow and psychological stimulation for better sexual response. Apomorphine helps with erectile dysfunction by activating dopamine receptors in the brain, which enhances libido and facilitates erections. Oxytocin may enhance emotional intimacy, reduce anxiety, and improve sexual satisfaction in men.	Troche / RDT	All	each
SILDENAFIL / ARGININE	Sildenafil relaxes smooth muscles in the penis. By allowing these muscles to relax, it increases blood flow to the area, making it easier to achieve and maintain an erection. Arginine increases blood flow.	Gel / Cream	2% / 3%	each
SILDENAFIL / ARGININE / MENTHOL	Sildenafil relaxes smooth muscles in the penis. By allowing these muscles to relax, it increases blood flow to the area, making it easier to achieve and maintain an erection. Arginine increases blood flow. Menthol is used alongside sildenafil in compounded topical gels and creams primarily as a skin penetration enhancer to improve the local absorption of the medication.	Gel / Cream	1% / 2% /3%	each
SILDENAFIL / TADALAFIL	Combining tadalafil and sildenafil may enhance erectile performance, providing both quick and prolonged effects, increasing spontaneity and flexibility in sexual activity. However, this combination should only be used under medical supervision to reduce risks of side effects like low blood pressure.	Capsule	50 mg / 12.5 mg	each
SILDENAFIL / TADALAFIL	Combining tadalafil and sildenafil may enhance erectile performance, providing both quick and prolonged effects, increasing spontaneity and flexibility in sexual activity. However, this combination should only be used under medical supervision to reduce risks of side effects like low blood pressure.	Capsule	55 mg / 12.5 mg	each
TADALAFIL	Combining tadalafil and sildenafil may enhance erectile performance, providing both quick and prolonged effects, increasing spontaneity and flexibility in sexual activity. However, this combination should only be used under medical supervision to reduce risks of side effects like low blood pressure.	Capsule	All	each
TADALAFIL	Long-lasting ED treatment, improves intimacy. Onset ~2 hrs; lasts up to 36 hrs.	Troche / RDT	Under 60 mg	each
TADALAFIL	Long-lasting ED treatment, improves intimacy. Onset ~2 hrs; lasts up to 36 hrs.	Troche / RDT	Over 60 mg	each
TADALAFIL / APOMORPHINE	Combining Tadalafil and Apomorphine may improve erectile function through dual mechanisms, enhancing both blood flow and psychological stimulation for better sexual response.	Troche / RDT	All	each
TADALAFIL / APOMORPHINE / OXYTOCIN	Combining Tadalafil and Apomorphine may improve erectile function through dual mechanisms, enhancing both blood flow and psychological stimulation for better sexual response. Oxytocin may enhance emotional intimacy, reduce anxiety, and improve sexual satisfaction in men.	Troche / RDT	All	each
TADALAFIL / GINGER ROOT	Tadalafil and ginger root are used in tandem to enhance male sexual health by boosting blood flow, relaxing smooth muscle, and decreasing vascular inflammation. Tadalafil serves as the primary clinical treatment for erectile dysfunction (ED), while ginger root acts as a complementary, natural botanical that supports overall cardiovascular function.	Capsule	7.5 mg / 190 mg	each
TADALAFIL / PAROXETINE	The combination of Tadalafil and Paroxetine is used to provide dual-action relief for men experiencing both Erectile Dysfunction (ED) and Premature Ejaculation (PE). Together, they treat the mind and the body to improve overall sexual satisfaction and performance confidence.	RDT	20 mg / 30 mg	each
TADALAFIL / TESTOSTERONE	Tadalafil and Testosterone serve different but complementary roles in men's sexual health. Tadalafil is primarily used to directly facilitate erections, while testosterone therapy restores the biological drive and hormonal environment needed for healthy sexual function	Mini Troche	All	each
TRIMIX	Trimix is an injectable medication for erectile dysfunction, combining alprostadil, papaverine, and phentolamine. This powerful combo relaxes the muscles and widens the blood vessels in the penis, helping you achieve a firm, long lasting erection fast and without relying on arousal. Trimix is typically used when oral ED medications are ineffective.	Injectable	All	5 mL
TRIMIX	Trimix is an injectable medication for erectile dysfunction, combining alprostadil, papaverine, and phentolamine. This powerful combo relaxes the muscles and widens the blood vessels in the penis, helping you achieve a firm, long lasting erection fast and without relying on arousal. Trimix is typically used when oral ED medications are ineffective.	Injectable	All	10 mL

ED Product Comparison		
Medication	Onset Time	Duration
Sildenafil	1 Hour	4-6 Hours
Tadalafil	2 Hours	Up to 36 Hours

WOMEN'S HEALTH

Our Women's Health portfolio delivers precision compounded therapies to support every stage of life - from hormonal balance and menopause management to reproductive and sexual wellness. Each product is designed to promote comfort, confidence, and overall quality of life with pharmaceutical-grade ingredients and personalized dosing.

WOMEN'S HEALTH PRODUCT OFFERINGS

PRODUCT	KNOWN USES	TYPE	STRENGTH	VOLUME
ANASTROZOLE	Anastrozol is an aromatase inhibitor. It is a prescription hormone therapy used primarily to treat and prevent hormone receptor-positive breast cancer in postmenopausal women.	Capsule / Tablet	0.5 mg	each
ANASTROZOLE	Anastrozol is an aromatase inhibitor. It is a prescription hormone therapy used primarily to treat and prevent hormone receptor-positive breast cancer in postmenopausal women.	Capsule / Tablet	1 mg	each
ANASTROZOLE	Anastrozol is an aromatase inhibitor. It is a prescription hormone therapy used primarily to treat and prevent hormone receptor-positive breast cancer in postmenopausal women.	Capsule / Tablet	1.5 mg	each
AROUSAL / SCREAM CREAM: AMINOPHYLLINE / ARGININE	Aminophylline and L-Arginine are combined in topical formulations (often referred to as "arousal creams" or "Scream Creams") to enhance female sexual health. They act as powerful vasodilators that increase blood flow to the clitoris and vaginal tissues, resulting in heightened sensitivity, improved natural lubrication, and enhanced orgasmic function.	Vaginal Cream	3% / 6%	15 g
BLISS CREAM: PT-141 / SILDENAFIL / ARGININE / NTG / PEPPERMINT OIL	These five agents enhance women's sexual health by targeting different aspects of the female sexual response, ranging from central brain chemistry to localized blood flow and sensory stimulation. PT-141 enhances sexual desire in women. L-Arginine improves overall sexual satisfaction, climax ability, and vaginal lubrication. Peppermint oil is incorporated into topical female arousal oils and massage blends to stimulate nerve endings, increase localized circulation, and magnify sexual excitement. NTG provides temporary relief of introital dyspareunia (painful intercourse) and vulvodinia by relaxing muscle hypertonicity and promoting blood circulation.	Vaginal Cream	0.1% / 0.2% / 6% / 0.25% / 0.06%	10 g
CLOMIPHENE	Clomiphene has been used to increase sperm counts in male patients with idiopathic oligospermia. It can be used in men to boost testosterone production, stimulate sperm production, and improve semen quality.	Tablet	50 mg	each
CLOMIPHENE	Clomiphene has been used to increase sperm counts in male patients with idiopathic oligospermia. It can be used in men to boost testosterone production, stimulate sperm production, and improve semen quality.	Tablet	50 mg	each
HYALURONIC ACID / DHEA / VITAMIN E	Hyaluronic Acid (HA), DHEA, and Vitamin E are heavily utilized to support female sexual health, primarily targeting vaginal dryness, painful intercourse (dyspareunia), and declining libido associated with menopause or hormonal imbalances. While they serve distinct biological functions, they are often combined in treatments.	Gel / Cream	0.5% / 1% / 50 IU / mL	30 mL
OXYTOCIN	Oxytocin may enhance emotional intimacy and sexual satisfaction. Oxytocin treats sexual dysfunction and enhances arousal.	Troche	Under 100 IU	Per Troche
OXYTOCIN	Oxytocin may enhance emotional intimacy and sexual satisfaction. Oxytocin treats sexual dysfunction and enhances arousal.	Troche	Over 100 IU	Per Troche
OXYTOCIN	Oxytocin may enhance emotional intimacy and sexual satisfaction. Oxytocin treats sexual dysfunction and enhances arousal.	Nasal Spray	40 IU / 0.1 mL	12 mL
OXYTOCIN	Oxytocin may enhance emotional intimacy and sexual satisfaction. Oxytocin treats sexual dysfunction and enhances arousal.	Nasal Spray	10 IU	12 mL
OXYTOCIN	Oxytocin may enhance emotional intimacy and sexual satisfaction. Oxytocin treats sexual dysfunction and enhances arousal.	Nasal Spray	60 IU	12 mL

PRODUCT	KNOWN USES	TYPE	STRENGTH	VOLUME
SILDENAFIL / AMINOPHYLLINE / ARGININE	Sildenafil improves blood circulation, improving vaginal lubrication and responsiveness. L-Arginine improves overall sexual satisfaction, climax ability, and vaginal lubrication. Aminophylline is used as a topical vasodilator to increase clitoral and genital blood flow, thereby enhancing sensitivity, arousal, and the ability to achieve orgasm.	Vaginal Cream	2% / 3% / 6%	15 g
SILDENAFIL / AMINOPHYLLINE / ARGININE / TESTOSTERONE	Sildenafil improves blood circulation, improving vaginal lubrication and responsiveness. L-Arginine improves overall sexual satisfaction, climax ability, and vaginal lubrication. Aminophylline is used as a topical vasodilator to increase clitoral and genital blood flow, thereby enhancing sensitivity, arousal, and the ability to achieve orgasm. Testosterone is used to treat low sexual desire.	Vaginal Cream	2% / 3% / 6% / 0.1%	15 g
SILDENAFIL / AMINOPHYLLINE / ARGININE / TESTOSTERONE	Sildenafil improves blood circulation, improving vaginal lubrication and responsiveness. L-Arginine improves overall sexual satisfaction, climax ability, and vaginal lubrication. Aminophylline is used as a topical vasodilator to increase clitoral and genital blood flow, thereby enhancing sensitivity, arousal, and the ability to achieve orgasm. Testosterone is used to treat low sexual desire.	Vaginal Cream	2% / 3% / 6% / 0.1%	15 g
TADALAFIL / TESTOSTERONE	Tadalafil and testosterone work by enhancing blood flow, hormone balance, and nerve sensitivity in the genital area. Testosterone supports libido directly by increasing female sexual desire and arousal. Sildenafil and tadalafil improve blood circulation, improving vaginal lubrication and responsiveness.	Mini Troche	All	each
TAMOXIFEN	Tamoxifen acts as a Selective Estrogen Receptor Modulator (SERM) used to block estrogen in breast tissue while mimicking it in bones and the uterus. It treats and prevents hormone-positive breast cancer.	Tablet	20 mg	each
WOW CREAM: SILDENAFIL / ARGININE / NTG	Sildenafil improves blood circulation, improving vaginal lubrication and responsiveness. L-Arginine improves overall sexual satisfaction, climax ability, and vaginal lubrication. Aminophylline is used as a topical vasodilator to increase clitoral and genital blood flow, thereby enhancing sensitivity, arousal, and the ability to achieve orgasm. Testosterone is used to treat low sexual desire. NTG provides temporary relief of introital dyspareunia (painful intercourse) and vulvodynia by relaxing muscle hypertonicity and promoting blood circulation.	Vaginal Cream	5% / 12% / 0.25%	10 g

HORMONE REPLACEMENT THERAPY

Our Hormone and Thyroid Support formulations help restore balance and vitality by optimizing hormonal function. From bioidentical testosterone and estrogen therapies to customized thyroid compounds, each prescription is tailored to improve mood, metabolism, and long-term wellbeing.

HORMONE REPLACEMENT THERAPY PRODUCT OFFERINGS

PRODUCT	KNOWN USES	TYPE	STRENGTH	VOLUME
ANASTROZOLE	Anastrozol is an aromatase inhibitor. It is a prescription hormone therapy used primarily to treat and prevent hormone receptor-positive breast cancer in postmenopausal women.	Capsule / Tablet	0.5 mg	each
ANASTROZOLE	Anastrozol is an aromatase inhibitor. It is a prescription hormone therapy used primarily to treat and prevent hormone receptor-positive breast cancer in postmenopausal women.	Capsule / Tablet	1 mg	each
ANASTROZOLE	Anastrozol is an aromatase inhibitor. It is a prescription hormone therapy used primarily to treat and prevent hormone receptor-positive breast cancer in postmenopausal women.	Capsule / Tablet	1.5 mg	each
ANASTROZOLE	Anastrolozole is prescribed to men to manage estrogen levels caused by testosterone replacement therapy or to boost testosterone production for fertility.	Capsule / Tablet	1.5 mg	each
BIESTROGEN	Biest is a customized formulation usually compounded by pharmacies to meet individual patient needs, particularly for those experiencing menopausal symptoms or hormonal imbalances.	Cream	All	30 g
BIESTROGEN / PROGESTERONE / TESTOSTERONE	Estrogen treats vasomotor symptoms (hot flashes), progesterone protects the uterine lining, and testosterone is used to boost libido, energy, and muscle/bone health.	Gel (PLO)	All	30 g
DHEA	DHEA cream may enhance hormone balance, improve skin health, boost energy levels, support mood stability, promote libido, and aid in age-related cognitive function, contributing to overall well-being.	Cream	All	30 g
DHEA	DHEA capsules may enhance energy levels, support hormone balance, improve mood, promote muscle strength, boost libido, and assist in age-related cognitive function, contributing to overall wellness and vitality.	Capsule	All	each
DHEA / ESTRADIOL	DHEA cream may enhance hormone balance, improve skin health, boost energy levels, support mood stability, promote libido, and aid in age-related cognitive function, contributing to overall well-being. Estradiol vaginal creams effectively relieve vaginal dryness, enhance elasticity, reduce menopausal symptoms, improve sexual function, support urinary health, and promote overall vaginal wellness in postmenopausal women.	Cream	All	each
DHEA / PREGNENOLONE	DHEA and pregnenolone are precursor (or "pro-hormone") supplements used in functional and bioidentical hormone replacement therapy (BHRT) to help the body naturally restore declining hormone levels. Pregnenolone: Often called the "mother of all hormones", it is the foundational building block your body uses to synthesize progesterone, DHEA, estrogen, and cortisol. DHEA: Synthesized from pregnenolone, DHEA is the direct precursor that various tissues convert into active androgens (testosterone) and estrogens.	Capsule	All	each
ESTRADIOL	Estradiol vaginal creams and suppositories effectively relieve vaginal dryness, enhance elasticity, reduce menopausal symptoms, improve sexual function, support urinary health, and promote overall vaginal wellness in postmenopausal women.	Gel(PLO)	All	30 g
ESTRIOL	Estriol vaginal creams relieve vaginal dryness, improve elasticity, reduce urinary incontinence, alleviate menopausal symptoms, support vaginal health, and enhance sexual function, promoting overall quality of life for women.	Cream	All	30 g
ESTRIOL	Estriol suppositories relieve vaginal dryness, improve elasticity, reduce urinary incontinence, alleviate menopausal symptoms, support vaginal health, and enhance sexual function, promoting overall quality of life for women.	Vaginal Suppository	All	each

PRODUCT	KNOWN USES	TYPE	STRENGTH	VOLUME
ESTRIOL / TESTOSTERONE	Estriol and testosterone are utilized in Hormone Replacement Therapy (HRT), most commonly in women managing perimenopause and menopause, to relieve specific physical and psychological symptoms. Testosterone is crucial for maintaining sexual desire, bone density, muscle mass, and mood. Estriol vaginal creams relieve vaginal dryness, improve elasticity, reduce urinary incontinence, alleviate menopausal symptoms, support vaginal health, and enhance sexual function.	Cream	All	30 g
LIOTHYRONINE (T3) / LEVOthyroxine (T4)	Levothyroxine (T4) and liothyronine (T3) are used in hormone replacement therapy (HRT) to treat hypothyroidism by restoring thyroid hormones to healthy, stable levels. Levothyroxine (T4): This is the synthetic form of the inactive hormone thyroxine (T4) and serves as the standard, first-line treatment. Liothyronine (T3): This is synthetic triiodothyronine (T3), the active form of the hormone.	SR Capsule	All	Per SR Capsule
LIOTHYRONINE SODIUM (T3)	Liothyronine sodium (T3) is the synthetic, active form of the thyroid hormone triiodothyronine. In hormone replacement therapy, it is used to directly supply the body with active thyroid hormone, mimicking natural T3 to regulate metabolism, body temperature, and energy levels.	SR Capsule	All	Per SR Capsule
PREGNENOLONE	Pregnenolone is primarily used as a supplementary building block to help restore and balance the body's natural hormone production pathways. Beyond basic hormone production, pregnenolone acts directly on the brain as a neurosteroid. It is frequently prescribed to enhance memory, reduce mental fog, and manage stress or menopausal depression.	Capsule	All	each
PROGESTERONE	Progesterone creams alleviate menopausal symptoms, support hormone balance, improve mood, enhance sleep quality, reduce anxiety, promote skin health, and assist in menstrual regulation, contributing to overall well-being.	Cream	All	30 g
PROGESTERONE	Progesterone RDT, troches, and tablets support hormone balance, alleviate menopausal symptoms, enhance sleep quality, reduce anxiety, improve mood, and promote menstrual regulation for overall reproductive health and well-being.	SR Capsule	Up to 75 mg	each
PROGESTERONE	Progesterone RDT, troches, and tablets support hormone balance, alleviate menopausal symptoms, enhance sleep quality, reduce anxiety, improve mood, and promote menstrual regulation for overall reproductive health and well-being.	SR Capsule	76 mg - 200 mg	each
PROGESTERONE	Progesterone RDT, troches, and tablets support hormone balance, alleviate menopausal symptoms, enhance sleep quality, reduce anxiety, improve mood, and promote menstrual regulation for overall reproductive health and well-being.	SR Capsule	250 mg - 300 mg	each
PROGESTERONE	Progesterone RDT, troches, and tablets support hormone balance, alleviate menopausal symptoms, enhance sleep quality, reduce anxiety, improve mood, and promote menstrual regulation for overall reproductive health and well-being.	SR Capsule	325 mg - 375 mg	each
PROGESTERONE	Progesterone RDT, troches, and tablets support hormone balance, alleviate menopausal symptoms, enhance sleep quality, reduce anxiety, improve mood, and promote menstrual regulation for overall reproductive health and well-being.	SR Capsule	400 mg	each
LETROZOLE	Letrozole (often sold under the brand name Femara) is an oral prescription medication that belongs to a class of drugs known as aromatase inhibitors. It works by blocking the enzyme that converts other hormones into estrogen, significantly lowering estrogen levels in the body.	Tablet	2.5 mg	each

TESTOSTERONE REPLACEMENT THERAPY

Our personalized Testosterone Replacement Therapy is designed to safely restore optimal hormone levels, helping you reclaim your strength, focus, and drive. By targeting the root causes of age-related or clinical decline, these customized formulations work to enhance lean muscle mass, sharpen mental clarity, boost energy levels, and revitalize overall vitality.

TESTOSTERONE REPLACEMENT PRODUCT OFFERINGS

PRODUCT	KNOWN USES	TYPE	STRENGTH	VOLUME
ANASTROZOLE	Anastrozole is prescribed to men to manage estrogen levels caused by testosterone replacement therapy or to boost testosterone production for fertility.	Capsule / Tablet	0.5 mg	each
ANASTROZOLE	Anastrozole is prescribed to men to manage estrogen levels caused by testosterone replacement therapy or to boost testosterone production for fertility.	Capsule / Tablet	1 mg	each
ANASTROZOLE	Anastrozole is prescribed to men to manage estrogen levels caused by testosterone replacement therapy or to boost testosterone production for fertility.	Capsule / Tablet	1.5 mg	each
CLOMIPHENE	Clomiphene has been used to increase sperm counts in male patients with idiopathic oligospermia. It can be used in men to boost testosterone production, stimulate sperm production, and improve semen quality.	Tablet	50 mg	each
CLOMIPHENE	Clomiphene has been used to increase sperm counts in male patients with idiopathic oligospermia. It can be used in men to boost testosterone production, stimulate sperm production, and improve semen quality.	Tablet	50 mg	each
ENCLOMIPHENE	Enclomiphene boosts testosterone production, enhances fertility, and maintains testicular function. It's used for men with low testosterone levels and secondary hypogonadism seeking to improve hormone levels and reproductive health.	Capsule	12.5 mg	each
ENCLOMIPHENE	Enclomiphene boosts testosterone production, enhances fertility, and maintains testicular function. It's used for men with low testosterone levels and secondary hypogonadism seeking to improve hormone levels and reproductive health.	Capsule	25 mg	each
GONADORELIN HCL	Gonadorelin hydrochloride (HCl) is a synthetic version of gonadotropin-releasing hormone (GnRH). It stimulates the pituitary gland to release luteinizing hormone (LH) and follicle-stimulating hormone (FSH). It is used diagnostically to evaluate pituitary function and clinically to treat fertility issues and manage side effects of testosterone replacement therapy (TRT).	Injectable	1 mg / 5 mL	5 mL
GONADORELIN HCL	Gonadorelin hydrochloride (HCl) is a synthetic version of gonadotropin-releasing hormone (GnRH). It stimulates the pituitary gland to release luteinizing hormone (LH) and follicle-stimulating hormone (FSH). It is used diagnostically to evaluate pituitary function and clinically to treat fertility issues and manage side effects of testosterone replacement therapy (TRT).	Injectable	1 mg / 5 mL	2-5 mL
PHENYLEPRINE	Phenylephrine is injected directly into the penis (intracavernosal injection) as a first-line medical treatment to reverse acute ischemic priapism. It works as a selective alpha-1 adrenergic receptor agonist. By stimulating these receptors, it causes the smooth muscle tissue and blood vessels within the penis to constrict which allows the penis to return to a flaccid state.	Injectable	1 mg / mL (diluted)	10 mL
PHENYLEPRINE	Phenylephrine is injected directly into the penis (intracavernosal injection) as a first-line medical treatment to reverse acute ischemic priapism. It works as a selective alpha-1 adrenergic receptor agonist. By stimulating these receptors, it causes the smooth muscle tissue and blood vessels within the penis to constrict which allows the penis to return to a flaccid state.	Injectable	10 mg / mL (undiluted)	1 mL
TESTOSTERONE	Testosterone enhances muscle mass, increases strength, boosts libido, improves mood, supports bone density, promotes fat loss, and contributes to overall vitality, mental clarity, and well-being in both men and women.	Atrevis	over 100 mg	30 g

PRODUCT	KNOWN USES	TYPE	STRENGTH	VOLUME
TESTOSTERONE	Testosterone enhances muscle mass, increases strength, boosts libido, improves mood, supports bone density, promotes fat loss, and contributes to overall vitality, mental clarity, and well-being in both men and women.	Lipoderm	100 mg	30 g
TESTOSTERONE	Testosterone enhances muscle mass, increases strength, boosts libido, improves mood, supports bone density, promotes fat loss, and contributes to overall vitality, mental clarity, and well-being in both men and women.	Troche	All	each
TESTOSTERONE	Testosterone enhances muscle mass, increases strength, boosts libido, improves mood, supports bone density, promotes fat loss, and contributes to overall vitality, mental clarity, and well-being in both men and women.	Versabase	up to 50 mg	30 g
TESTOSTERONE	Testosterone enhances muscle mass, increases strength, boosts libido, improves mood, supports bone density, promotes fat loss, and contributes to overall vitality, mental clarity, and well-being in both men and women.	Atrevis	over 100 mg	30 g
TESTOSTERONE	Testosterone enhances muscle mass, increases strength, boosts libido, improves mood, supports bone density, promotes fat loss, and contributes to overall vitality, mental clarity, and well-being in both men and women.	Lipoderm	100 mg	30 g
TESTOSTERONE	Testosterone enhances muscle mass, increases strength, boosts libido, improves mood, supports bone density, promotes fat loss, and contributes to overall vitality, mental clarity, and well-being in both men and women.	Troche	All	each
TESTOSTERONE	Testosterone enhances muscle mass, increases strength, boosts libido, improves mood, supports bone density, promotes fat loss, and contributes to overall vitality, mental clarity, and well-being in both men and women.	Versabase	up to 50 mg	30 g
TESTOSTERONE CYPIONATE (GRAPE SEED OIL)	Testosterone cypionate is an injectable prescription androgen primarily used as testosterone replacement therapy (TRT) in adult males with diagnosed hypogonadism—a condition where the body fails to produce enough natural testosterone. It helps restore healthy hormone levels to relieve symptoms like low sex drive, fatigue, and muscle loss.	Injectable	200 mg / mL	1 x 1 mL
TESTOSTERONE CYPIONATE / ENANTHATE (90/10) (GRAPE SEED OIL)	Testosterone Cypionate and Testosterone Enanthate are long-acting, injectable androgen medications primarily used for Testosterone Replacement Therapy (TRT) to treat male hypogonadism (low testosterone). Both restore testosterone levels to alleviate symptoms like low libido, fatigue, and muscle loss.	Injectable	200 mg / mL	1 x 5 mL
TESTOSTERONE CYPIONATE / ENANTHATE (90/10) (GRAPE SEED OIL)	Testosterone Cypionate and Testosterone Enanthate are long-acting, injectable androgen medications primarily used for Testosterone Replacement Therapy (TRT) to treat male hypogonadism (low testosterone). Both restore testosterone levels to alleviate symptoms like low libido, fatigue, and muscle loss.	Injectable	200 mg / mL	2 x 5 mL
TESTOSTERONE ENANTHATE	Testosterone enanthate is an injectable androgen medication primarily used for testosterone replacement therapy (TRT). It treats conditions caused by a deficiency or absence of natural testosterone (due to pituitary-hypothalamic injury or testicular failure). It helps restore healthy testosterone levels to alleviate symptoms like fatigue, low libido, reduced muscle mass, and decreased bone density.	Injectable	100 mg / mL	1 x 1 mL
VAZCULEP	Vazculep (phenylephrine hydrochloride) is an intravenous medication used to treat clinically significant low blood pressure (hypotension).	Injectable	1 mL (commercially avail)	10 mg / mL

INTRAVENOUS AND INTRAMUSCULAR HEALTH

Our Intravenous (IV) and Intramuscular (IM) therapies deliver targeted vitamin, mineral, and antioxidant blends directly into the bloodstream for maximum absorption and immediate cellular support. From deep hydration and immune defense to accelerated recovery and metabolic enhancement, these customized nutrient therapies are engineered to rapidly restore your body's optimal vitality.

INTRAVENOUS AND INTRAMUSCULAR PRODUCT OFFERINGS

PRODUCT	KNOWN USES	TYPE	STRENGTH	VOLUME
AMINO BLEND: GLUTAMINE / ORNITHINE / ARGININE / LYSINE / CITRULLINE / CARNITINE	This specific combination of amino acids and derivatives (frequently compounded into wellness injections or pre-workout stacks) is used to optimize athletic performance, accelerate tissue recovery, and enhance metabolic function. Together, they promote blood flow, increase cellular energy, and support the immune system.	IV / IM	30 mg / 50 mg / 100 mg / 50 mg / 50 mg / 100 mg per mL	10 mL
ASCORBIC ACID	Ascorbic acid (Vitamin C) is a vital water-soluble nutrient and potent antioxidant. It is primarily used to prevent or treat Vitamin C deficiency and scurvy. Additionally, it supports immune function, aids in collagen production for wound healing, and enhances the intestinal absorption of iron from plant-based foods.	IV / IM	500 mg / mL	50 mL
B7 BIOTIN	Vitamin B7 (biotin) is an essential nutrient that helps your body metabolize fats, carbohydrates, and proteins, converting the food you eat into usable energy. It also plays a critical role in gene regulation, cell signaling, and the creation of keratin, a foundational protein in your hair, skin, and nails.	IV / IM	10 mg / mL	10 mL
B-COMPLEX	B-Complex vitamins enhance energy production, support metabolism, reduce fatigue, and promote overall vitality by aiding in nutrient conversion and brain function.	IV / IM	100 mg / 2 mg / 100 mg / 2 mg / 2 mg per mL	30 mL
D3	Vitamin D3 enhances energy by supporting calcium absorption, improving muscle function, and boosting mood, contributing to overall vitality and reduced fatigue.	Intramuscular	100,000 IU / mL	10 mL
L-GLUTATHIONE	Glutathione supports longevity by reducing oxidative stress, enhancing detoxification, and promoting cellular health. Injections provide rapid effects, nasal delivers quick absorption, while hydration drinks offer convenience and steady release.	IV / IM	200 mg / mL	5 mL
METHYLCOBALAMIN B12	Methylcobalamin (B12) directly promotes energy production and enhances neurological function, while cyanocobalamin requires conversion to active forms, making methylcobalamin more readily available for immediate energy support.	IV / IM	10 mg / mL	10 mL
MINERAL BLEND: MAGNESIUM CHLORIDE / ZINC / MANGANESE / COPPER / SELENIUM	This combination of minerals is a powerful micronutrient blend of dietary supplements to support overall wellness, athletic recovery, immune function, and metabolic health. Magnesium Chloride: Essential for muscle relaxation and it also regulates the heartbeat. Zinc: critical for cognitive development, and cellular metabolism. Manganese: A mineral required for bone development, joint health, and the formation of connective tissues. It also helps the body metabolize amino acids, carbohydrates, and cholesterol. Copper: Works alongside iron to form red blood cells and is necessary for maintaining healthy nerves, blood vessels, and connective tissue. It also plays a role in energy production and antioxidant defense. Selenium: A potent antioxidant that protects cells from oxidative stress. It is heavily relied upon by the thyroid gland to regulate metabolism and is crucial for reproductive health and immune defense.	IV / IM	80 mg / 1 mg / 20 mcg / 0.2 mg / 8 mcg per mL	10 mL
NAD+	NAD supports longevity by enhancing cellular energy production, improving DNA repair, and boosting metabolic functions. Injections provide rapid effects, nasal delivery offers quick absorption, while hydration drinks ensure convenient, sustained release.	Injectable	50 mg / mL	5 mL
NAD+	NAD supports longevity by enhancing cellular energy production, improving DNA repair, and boosting metabolic functions. Injections provide rapid effects, nasal delivery offers quick absorption, while hydration drinks ensure convenient, sustained release. Millers Pharmacy patented low osmolality hydration drinks promote better fluid absorption and cellular hydration for optimal wellness.	Injectable	250 mg / mL	5 mL

PRODUCT	KNOWN USES	TYPE	STRENGTH	VOLUME
RELAX BLEND: GABA / MAGNESIUM CHLORIDE / TAURINE / THEANINE	This combination of ingredients is frequently grouped together (often in supplements or intravenous IV therapy) to promote relaxation, reduce stress, manage anxiety, and improve sleep quality. GABA (Gamma-Aminobutyric Acid): A primary inhibitory neurotransmitter in the brain. It acts as a "brake" for the central nervous system, helping to slow down brain activity to decrease feelings of fear, stress, and anxiety. Magnesium Chloride: An essential mineral that soothes the nervous system, regulates neurotransmitters, and relaxes tense muscles. It also works synergistically with GABA to promote restorative sleep. Taurine: An amino acid that supports the central nervous system. It helps regulate calcium in the body and binds to GABA receptors, providing neuroprotective and relaxing effects. L-Theanine: An amino acid commonly found in green tea that promotes mental calmness without causing drowsiness. It boosts alpha brain waves associated with relaxation and helps reduce the excitatory effects of stress.	IV / IM	50 mg / 50 mg / 50 mg / 50 mg per ml	10 mL

DERMATOLOGY & SKINCARE

Our Dermatology and Skincare line merges science and aesthetics to promote healthy, radiant skin. Using clinical-grade actives and advanced compounding techniques, we offer treatments for anti-aging, acne, pigmentation, and post-procedure care - helping patients achieve smooth, balanced, and confident skin.

DERMATOLOGY & SKINCARE PRODUCT OFFERINGS

PRODUCT	KNOWN USES	TYPE	STRENGTH	VOLUME
ACNE GONE CREAM: TRETINOIN / VITAMIN E / PRACASIL IN CREAM BASE	A compounded Tretinoin, Vitamin E, and PracaSil-Plus cream is typically prescribed to treat acne, diminish surgical or acne scars, and minimize hyperpigmentation and fine lines. This formulation allows the powerful cell-turnover properties of tretinoin to work alongside the deeply moisturizing and scar-healing benefits of the base.	Cream	0.025 - 0.1% / 5% / 10%	30 g
AGELESS CREAM: ACETYL HEXAPEPTIDE / GHK-CU / NIACINIMIDE	Acetyl hexapeptide, GHK-Cu, and niacinamide are powerhouse skincare ingredients that offer targeted anti-aging, regenerative, and barrier-repairing benefits. They are often layered in daily routines to improve skin texture, firmness, and overall radiance.	Cream	0.5% / 0.2% / 2%	30 g
ANTI-AGING TONING CLEANSER: DMAE / PANTHENOL WITH BERGAMOT FRAGRANCE / FOAM CLEANSER	DMAE firms and tightens the skin, Panthenol hydrates and soothes, and Bergamot Fragrance provides a scent profile, all integrated via a Foam Cleanser. Bisabolol: Derived from chamomile, this ingredient is a celebrated anti-inflammatory that calms redness.	Foam Cleanser	3.8% / 1%	50 mL
ANTI-AGING TONING CLEANSER: DMAE / PANTHENOL WITH BERGAMOT FRAGRANCE / FOAM CLEANSER	DMAE firms and tightens the skin, Panthenol hydrates and soothes, and Bergamot Fragrance provides a scent profile, all integrated via a Foam Cleanser. Bisabolol: Derived from chamomile, this ingredient is a celebrated anti-inflammatory that calms redness.	Foam Cleanser	3.8% / 1%	100 mL
ANTI-AGING TONING CLEANSER (PREMIUM): DMAE/ PANTHENOL/ BISABOLOL/ ALOE VERA WITH BERGAMOT FRAGRANCE, FOAM CLEANSER	DMAE firms and tightens the skin, Panthenol hydrates and soothes, and Bergamot Fragrance provides a scent profile, all integrated via a Foam Cleanser. Bisabolol: Derived from chamomile, this ingredient is a celebrated anti-inflammatory that calms redness, soothes irritation, and neutralizes surface free radicals to slow down premature aging. Aloe Vera: A classic botanical known for its lightweight, cooling, and anti-inflammatory properties. It delivers immediate, non-greasy hydration to replenish the skin.	Foam Cleanser	3.8% / 1% / 0.5% / 2%	50 mL
ANTI-HYPERPIGMENTATION CREAM: IN VERSABASE CREAM WITH BERGAMOT FRAGRANCE. HYDROQUINONE / TRETINOIN / KOJIC ACID / HYDROCORTISONE	This prescription-strength compounded cream is primarily used to treat stubborn hyperpigmentation, melasma, sun damage, and age spots. It achieves this through a powerful multi-step approach that inhibits dark pigment production while utilizing a soothing base to minimize the irritation typically caused by such potent active ingredients.	Cream	up to 8% / up to 0.1% / 4% / 0.25%	30 g
ANTI-PUFF EYE CREAM (ORIGINAL): BISABOLOL / VIT K / GREEN TEA / CAFFEINE / VIT E WITH BERGAMOT	This powerhouse combination works synergistically in skincare to soothe inflammation, fade discoloration, boost antioxidant protection, and defend against premature aging. Isabolol: acts as a super-soother that calms redness, reduces irritation, and helps strengthen the skin barrier. It also acts as a penetration enhancer, helping other active ingredients absorb more deeply. Vitamin K: used to fade dark under-eye circles, minimize bruising, and reduce spider veins or persistent facial redness (such as rosacea) by supporting blood circulation and clotting. Green Tea: A potent antioxidant, green tea is highly effective at neutralizing environmental free radicals, preventing collagen breakdown, and controlling excess sebum (oil) production. Caffeine: acts as a vasoconstrictor to temporarily tighten the skin. It is primarily used to depuff the eyes, reduce fluid retention, and improve microcirculation for a brighter, more awake appearance. Vitamin E: A heavy-duty moisturizer and antioxidant, Vitamin E protects the skin from oxidative stress. Bergamot: It is highly aromatic and often added to formulas for its refreshing, uplifting scent.	Eye Cream	0.5% / 0.5% / 1% / 1% / 1%	15 g

PRODUCT	KNOWN USES	TYPE	STRENGTH	VOLUME
ASCORBIC ACID / COQ10 / DMAE / ESTRIOL / TRETINOIN	These five potent ingredients create highly targeted, multi-tasking anti-aging creams. Working synergistically, they are used to stimulate collagen production, reverse sun damage, boost skin thickness, and neutralize environmental stressors. Ascorbic Acid (Vitamin C): A powerful antioxidant that neutralizes free radicals, brightens the complexion, and fades hyperpigmentation. It also acts as a vital cofactor in collagen biosynthesis, making it a staple for maintaining skin firmness. CoQ10 (Coenzyme Q10): A lipid-soluble antioxidant that protects against cellular oxidation and photoaging. As natural CoQ10 levels decline with age, topical application helps diminish the depth of wrinkles (like "crow's feet") and improves overall skin elasticity. DMAE: Widely utilized for its immediate firming and lifting effects. It is believed to help enhance muscle tone beneath the skin and reduce the appearance of sagging. Estriol: A gentle, naturally occurring estrogen that is highly effective when applied topically. As estrogen levels drop during perimenopause and menopause, skin can suffer from dryness, thinning, and collagen loss. Estriol combats this by plumping the skin, stimulating collagen, and boosting hydration and barrier function. Tretinoin: accelerates skin cell turnover and deeply stimulates collagen production, resulting in smoothed fine lines, unclogged pores, and improved skin texture.	Cream	5% / 1% / 3% / 0.3% / 0.01%	15 g
ASCORBIC ACID / COQ10 / DMAE / HYALURONIC ACID/ LIPOIC ACID	This powerful cocktail of ingredients combines antioxidants, firming agents, and deep hydrators to brighten skin, boost collagen, smooth wrinkles, and defend against environmental damage. Ascorbic Acid (Vitamin C): A powerful antioxidant that neutralizes free radicals, brightens the complexion, and fades hyperpigmentation. It also acts as a vital cofactor in collagen biosynthesis, making it a staple for maintaining skin firmness. CoQ10 (Coenzyme Q10): A lipid-soluble antioxidant that protects against cellular oxidation and photoaging. As natural CoQ10 levels decline with age, topical application helps diminish the depth of wrinkles (like "crow's feet") and improves overall skin elasticity. DMAE: Widely utilized for its immediate firming and lifting effects. It is believed to help enhance muscle tone beneath the skin and reduce the appearance of sagging. Hyaluronic Acid: A powerful humectant that draws moisture into the skin, holding up to 1,000 times its weight in water. It provides deep, non-greasy hydration and is often paired with ascorbic acid to enhance penetration and soothe the skin. Lipic Acid (Alpha Lipoic Acid): A highly potent, universal antioxidant that is both water- and fat-soluble, allowing it to penetrate all parts of skin cells. It revitalizes other antioxidants (like vitamins C and E), minimizes pores, and helps smooth skin texture.	Cream	5% / 1% / 3% / 0.1% / 2%	15 g
ASCORBIC ACID / DMAE / ESTRIOL	This powerful cocktail of ingredients combines antioxidants, firming agents, and deep hydrators to brighten skin, boost collagen, smooth wrinkles, and defend against environmental damage. Ascorbic Acid (Vitamin C): A powerful antioxidant that neutralizes free radicals, brightens the complexion, and fades hyperpigmentation. It also acts as a vital cofactor in collagen biosynthesis, making it a staple for maintaining skin firmness. DMAE: Widely utilized for its immediate firming and lifting effects. It is believed to help enhance muscle tone beneath the skin and reduce the appearance of sagging. Estriol: A gentle, naturally occurring estrogen that is highly effective when applied topically. As estrogen levels drop during perimenopause and menopause, skin can suffer from dryness, thinning, and collagen loss. Estriol combats this by plumping the skin, stimulating collagen, and boosting hydration and barrier function.	Cream	15% / 3% / 0.3%	15 g
BACK BAR: COLLAGEN BUILDING GHK (Cu) / GHK-cu / BIOPEPTIDES	GHK-Cu (glycyl-L-histidyl-L-lysine coupled with copper) is a naturally occurring peptide that stimulates collagen and elastin synthesis, accelerates wound healing, and reduces inflammation and oxidative stress. It is widely used in anti-aging skincare as a serum or cream to firm the skin, reduce wrinkles, and improve elasticity.	Cream	1% / 10%	120 g MD Pump
BACK BAR (PREMIUM) ANTI-AGING TONING CLEANSER: DMAE / PANTHENOL / BISABOLOL / ALOE VERA WITH BERGAMOT FRAGRANCE / FOAM CLEANSER	This specific combination of ingredients is typically found in an anti-aging and soothing foaming cleanser. The foam format provides a gentle, non-abrasive vehicle to cleanse the skin, while the active ingredients work together to lift impurities, hydrate, and calm inflammation. DMAE firms and tightens the skin, Panthenol hydrates and soothes, and Bergamot Fragrance provides a scent profile, all integrated via a Foam Cleanser. Bisabolol: Derived from chamomile, this ingredient is a celebrated anti-inflammatory that calms redness, soothes irritation, and neutralizes surface free radicals to slow down premature aging. Aloe Vera: A classic botanical known for its lightweight, cooling, and anti-inflammatory properties. It delivers immediate, non-greasy hydration to replenish the skin. Bergamot: used to balance oily skin and provides natural antibacterial properties. It is highly aromatic and often added to formulas for its refreshing, uplifting scent.	Foam Cleanser	3.8% / 1% / 0.5% / 2%	100 mL

PRODUCT	KNOWN USES	TYPE	STRENGTH	VOLUME
BLEMISH BLOCK: BISABOLOL / BENZOYL PEROXIDE / HYDROCORTISONE / PRACASIL / SALICYLIC ACID / VITAMIN E IN BENTONITE CLAY MASK	These ingredients are often combined in a custom compounded treatment formulated to treat severe acne, reduce scarring, and alleviate inflammatory skin conditions. The bentonite clay acts as a base to purge pores and control oil, while the active ingredients work together to fight blemishes, soothe irritation, and promote healing. Bentonite Clay: absorbs excess oil and lifting debris out of clogged pores. It gently exfoliates the skin's surface while the mask dries. Benzoyl Peroxide: penetrates pores to kill acne-causing bacteria and prevent new breakouts. Salicylic Acid: penetrates into the sebum to dissolve dead skin cells, unclog pores, and reduce blackheads. Hydrocortisone: reduce inflammation, redness, and itching associated with flare-ups or reactions. Bisabolol: calms skin irritation and helps the other active ingredients penetrate the skin. PracaSil: base designed for scars and compromised skin barriers. It provides a protective layer and enhances skin repair. Vitamin E: protects skin cells from oxidative stress, promotes healing, and nourishes the skin.	Mask	2% / 5% / 0.25% / 10% / 2% / 2%	10 g
BLT TOPICAL NUMBING AGENT: BENZOCAINE/ LIDOCAINE/ TETRACAINE	Benzocaine, lidocaine, and tetracaine are local anesthetics that work by blocking sodium channels in nerve cells, temporarily halting the pain signals sent to the brain. They are commonly combined (often as "BLT" cream) or used individually, depending on the desired speed, depth, and duration of the numbing effect.	Anhydrous	20 / 6 / 4% 20 / 10 / 4%	30 g
BLT TOPICAL NUMBING AGENT: BENZOCAINE/ LIDOCAINE/ TETRACAINE	Benzocaine, lidocaine, and tetracaine are local anesthetics that work by blocking sodium channels in nerve cells, temporarily halting the pain signals sent to the brain. They are commonly combined (often as "BLT" cream) or used individually, depending on the desired speed, depth, and duration of the numbing effect.	Anhydrous	20 / 6 / 4% 20 / 10 / 4%	60 g
BLT TOPICAL NUMBING AGENT: BENZOCAINE/ LIDOCAINE/ TETRACAINE	Benzocaine, lidocaine, and tetracaine are local anesthetics that work by blocking sodium channels in nerve cells, temporarily halting the pain signals sent to the brain. They are commonly combined (often as "BLT" cream) or used individually, depending on the desired speed, depth, and duration of the numbing effect.	Anhydrous	20 / 6 / 4% 20 / 10 / 4%	90 g
CO-Q 10 / TRETINOIN / VITAMIN E WITH BERGAMOT FRAGRANCE	CoQ10 (Coenzyme Q10): protects against cellular oxidation and photoaging. As natural CoQ10 levels decline with age, topical application helps diminish the depth of wrinkles (like "crow's feet") and improves overall skin elasticity. Tretinoin: accelerates skin cell turnover and deeply stimulates collagen production, resulting in smoothed fine lines, unclogged pores, and improved skin texture. Bergamot: used to balance oily skin and provides natural antibacterial properties. It is highly aromatic and often added to formulas for its refreshing, uplifting scent.	Cream	1% / up to .1%	30 g
COLLAGEN BUILDING GHK (CU): GHK-CU/ BIOPEPTIDES	GHK-Cu (copper tripeptide-1) is a naturally occurring peptide that promotes skin regeneration by boosting collagen production, reducing inflammation, and protecting against environmental stress. It is widely used in anti-aging routines to tighten loose skin, smooth fine lines, and heal photodamage	Cream	1% / 10%	30 g
DAILY EXFOLIATING CLEANSER (ADVANCED): GLYCOLIC ACID (W/V) / LACTIC ACID / ALOE VERA / TEA TREE OIL / FAT FREE LOTION BASE	This formulated blend acts as a multi-tasking chemical exfoliant and calming moisturizer. The AHAs dissolve dead skin cell bonds, aloe vera and lotion base hydrate and soothe, and tea tree oil targets acne and bacteria. Glycolic Acid (W/V): penetrates deep into the skin to boost cellular turnover and dissolve the "glue" holding dead skin together. Lactic Acid: A gentler, hydrating AHA that works alongside glycolic acid on the skin's surface to smooth texture and improve moisture retention. Aloe Vera: Provides anti-inflammatory and hydrating properties to counteract the redness and irritation often caused by exfoliating acids. Tea Tree Oil: Acts as a natural antimicrobial and antibacterial agent, helping to clear clogged pores and soothe acne-prone areas. Fat-Free Lotion Base: Delivers the actives without clogging pores (non-comedogenic), ensuring a lightweight delivery system suitable for oily or acne-prone skin.	Lotion	3% / 5% / 1% / 1%	30 g
DAILY EXFOLIATOR: GLYCOLIC ACID (W/V) FAT FREE LOTION BASE	A Glycolic Acid fat-free lotion base is used as a daily chemical exfoliator to dissolve dead skin cells, improve texture, and unclog pores. Because it is fat-free, it provides these resurfacing benefits in a lightweight, non-greasy formula perfect for oil-prone, combination, or acne-prone skin. Glycolic Acid (W/V): penetrates deep into the skin to boost cellular turnover and dissolve the "glue" holding dead skin together. Fat-Free Lotion Base: Delivers the actives without clogging pores (non-comedogenic), ensuring a lightweight delivery system suitable for oily or acne-prone skin.	Topical Lotion	10% / 5%	30 g
ESTRIOL WITH ALOE VERA	Estriol with Aloe Vera is used as a topical formulation frequently for menopausal skin to improve hydration, restore dermal thickness, and boost collagen production. The estriol binds to local estrogen receptors to counteract menopausal collagen loss, while the aloe vera delivers soothing, moisturizing, and barrier-repairing properties.	Cream	0.3% / 1%	15 g

PRODUCT	KNOWN USES	TYPE	STRENGTH	VOLUME
ESTRIOL / DMAE / HYALURONIC ACID	Estriol, DMAE, and Hyaluronic Acid are frequently combined in advanced anti-aging and menopausal skincare formulations. Together, they work synergistically to replenish lost hormones, tighten sagging skin, and deeply hydrate, restoring a plump and youthful complexion. The estriol binds to local estrogen receptors to counteract menopausal collagen loss, while the aloe vera delivers soothing, moisturizing, and barrier-repairing properties. DMAE firms and tightens the skin. Hyaluronic Acid: draws and retains moisture in the skin. It provides intensive, deep hydration, temporarily plumping the skin to smooth out fine lines and soothing any inflammation.	Cream / Gel	0.3% / 3% / 0.05%	15 g
GHK-cu	GHK Cu promotes collagen production, reduces wrinkles, and enhances skin repair. Helps restore youthful skin, improve texture, and diminish signs of aging for a smoother, firmer complexion.	Injectable	10 mg / mL	5 mL
GHK-cu	GHK Cu promotes collagen production, reduces wrinkles, and enhances skin repair. Helps restore youthful skin, improve texture, and diminish signs of aging for a smoother, firmer complexion.	Cream	5 mg	30 g
GHK-cu / BIOPEPTIDES / COENZYME Q10	GHK-Cu, peptides, and Coenzyme Q10 are highly regarded in skincare for their anti-aging and regenerative properties. They are formulated into serums, creams, and lotions to rebuild collagen, protect against environmental damage, and provide essential cellular energy to the skin. GHK Cu promotes collagen production, reduces wrinkles, and enhances skin repair. Together, these ingredients restore youthful skin, improve texture, and diminish signs of aging for a smoother, firmer complexion. CoQ10 (Coenzyme Q10): protects against cellular oxidation and photoaging. As natural CoQ10 levels decline with age, topical application helps diminish the depth of wrinkles (like "crow's feet") and improves overall skin elasticity.	Cream	1% / 10% / 2%	30 g
GHK-cu / BPC	GHK-Cu (copper peptide) and BPC (Body Protection Compound, typically BPC-157) are used in skincare to accelerate tissue repair, stimulate collagen production, and reduce inflammation. They are primarily used topically as restorative serums or in post-procedure care. GHK Cu promotes collagen production, reduces wrinkles, and enhances skin repair. Helps restore youthful skin, improve texture, and diminish signs of aging for a smoother, firmer complexion. BPC is used to accelerate the healing of wounds, reduce redness, and strengthen the skin's protective barrier by promoting the formation of new blood vessels	Cream	2mg / 2mg / g	15 g
GLYCOLIC ACID (W/V) PEEL	Glycolic acid (W/V) peels are chemical exfoliants used in skincare to dissolve the bonds between dead skin cells. They are primarily used to treat fine lines, uneven texture, acne, and hyperpigmentation by accelerating cell turnover and promoting collagen production.	Solution	0.3	30 mL
HYDROQUINONE / HYDROCORTISONE / TRETINOIN	This formula brightens skin, reduces hyperpigmentation, enhances collagen production, provides antioxidant protection, and improves overall skin texture, promoting a more even, radiant complexion. Hydroquinone lightens dark spots, melasma, and uneven tone by inhibiting melanin synthesis, while hydrocortisone reduces inflammation, redness, and irritation. Tretinoin: accelerates skin cell turnover and deeply stimulates collagen production, resulting in smoothed fine lines, unclogged pores, and improved skin texture.	Cream	6% / 2.5% / 0.05%	15 g
HYDROQUINONE / KOJIC ACID	Hydroquinone and Kojic Acid are potent topical ingredients used to treat hyperpigmentation (like melasma, age spots, and acne scars) by inhibiting the enzyme tyrosinase to slow down melanin production. While hydroquinone offers rapid, potent results, kojic acid acts as a gentler, naturally derived alternative.	Cream	10% / 2%	15 g
HYDROQUINONE / VITAMIN D	Hydroquinone is a medical-grade lightening agent used to treat hyperpigmentation, whereas Vitamin D is a nourishing vitamin that supports skin regeneration and calms inflammation. Though they are entirely different, dermatologists sometimes formulate them together in custom compounds to fade dark spots while keeping the skin barrier healthy.	Cream	8% / 1%	15 g
HYPERPIGMENT CORRECTOR: IN VERSABASE CREAM WITH BERGAMOT FRAGRANCE / HYDROQUINONE / TRETINOIN / KOJIC ACID / HYDROCORTISONE / VITAMIN E / PRACASIL	This compounded cream is a customized dermatology treatment typically used to treat stubborn hyperpigmentation, such as melasma, freckles, and post-inflammatory dark spots. Hydroquinone: lightens existing dark patches. Tretinoin: Increases skin cell turnover to shed pigmented cells and boosts the penetration of other ingredients. Kojic Acid: assists in fading pigment. Hydrocortisone: reduces inflammation, redness, and the irritation often caused by tretinoin and hydroquinone. Vitamin E: protects the skin and help heal the skin barrier. Pracasil: A silicone-based ingredient (often included as Pracasil-Plus) designed to form a protective barrier, improve the cosmetic feel, and minimize scarring. VersaBase: A hypoallergenic, non-comedogenic base that ensures deep, effective transdermal delivery of the ingredients while keeping the skin moisturized. Bergamot Fragrance: Added for scent.	Cream	up to 8% / up to 0.1% / 4% / 0.25% / 5% / 10%	15 g

PRODUCT	KNOWN USES	TYPE	STRENGTH	VOLUME
HYPERPIGMENT CORRECTOR: IN VERSABASE CREAM WITH BERGAMOT FRAGRANCE / HYDROQUINONE / TRETINOIN / KOJIC ACID / HYDROCORTISONE / VITAMIN E / PRACASIL	This compounded cream is a customized dermatology treatment typically used to treat stubborn hyperpigmentation, such as melasma, freckles, and post-inflammatory dark spots. Hydroquinone: lightens existing dark patches. Tretinoin: Increases skin cell turnover to shed pigmented cells and boosts the penetration of other ingredients. Kojic Acid: assists in fading pigment. Hydrocortisone: reduces inflammation, redness, and the irritation often caused by tretinoin and hydroquinone. Vitamin E: protects the skin and help heal the skin barrier. Pracasil: A silicone-based ingredient (often included as Pracasil-Plus) designed to form a protective barrier, improve the cosmetic feel, and minimize scarring. VersaBase: A hypoallergenic, non-comedogenic base that ensures deep, effective transdermal delivery of the ingredients while keeping the skin moisturized. Bergamot Fragrance: Added for scent.	Cream	up to 8% / up to 0.1% / 4% / 0.25% / 5% / 10%	15 g
HYPOPIGMENT CORRECTOR: GHK/ COQ10/ ASCORBIC ACID/ PRACASIL	These four ingredients are utilized in dermatology and advanced skincare to target aging, sun damage, and scar healing. While Ascorbic Acid and CoQ10 are standard over-the-counter additions, IGHK (a specific peptide sequence) and Pracasil are typically found in customized, professional, or compounded skincare lines. Ascorbic Acid (Vitamin C): A powerful antioxidant that neutralizes free radicals, brightens the complexion, and fades hyperpigmentation. It also acts as a vital cofactor in collagen biosynthesis, making it a staple for maintaining skin firmness. CoQ10 (Coenzyme Q10): A lipid-soluble antioxidant that protects against cellular oxidation and photoaging. As natural CoQ10 levels decline with age, topical application helps diminish the depth of wrinkles (like "crow's feet") and improves overall skin elasticity. IGHK: stimulates collagen production, improves skin elasticity, and reduces wrinkles. It is also used to accelerate wound healing and reduce inflammation. Pracasil: A silicone-based ingredient (often included as Pracasil-Plus) designed to form a protective barrier, improve the cosmetic feel, and minimize scarring.	Cream	0.5% / 2% / 5% / 10%	20 g
"KYBELLA LIKE" DEOXYCHOLIC ACID / LIDOCAINE	Deoxycholic acid and lidocaine are combined in injectable treatments—most commonly known by the brand name Kybella - to non-surgically dissolve unwanted submental fat (double chin) and contour the jawline. Lidocaine is used specifically as a numbing agent to minimize the discomfort and burning sensation associated with the deoxycholic acid injections.	Injectable	15 mg / 1 mg	30 mL
LUSCIOUS LASH SERUM: ARGININE / BIMATOPROST / GHK / PROLINE / VITAMIN D	These five ingredients—BIMA (Bimatoprost), ARG (Arginine), GHK (Peptide), PROLINE, and VITAMIN D—are common components in eyelash serums and medical treatments. They work synergistically to condition, strengthen, and actively stimulate the growth phase of your lashes. BIMATOPROST: The only FDA-approved ingredient clinically proven to grow eyelashes. It helps shift hair follicles from the resting phase into the active growth phase, increasing length, thickness, and darkness. GHK (Tripeptide-1): A copper peptide that acts as a signaling molecule to stimulate collagen production and promote skin health at the base of the lash line, which improves the microenvironment for hair follicles. ARGinine: promotes blood circulation to the hair roots, delivering vital nutrients. PROLINE: An amino acid that acts as a building block for keratin, the primary protein that makes up your eyelashes. It helps prevent lash breakage and brittleness. VITAMIN D: Supports cellular turnover and hair follicle regeneration. It helps regulate the hair growth cycle to prevent premature thinning.	Serum		4 mL
MOISTURE RICH EYE CORRECTOR PM: PALMITOYL PENTAPEPTIDE-4 / BISABOLOL / VITAMIN K / GREEN TEA / CAFFEINE / VITAMIN E WITH BERGAMOT	This multi-ingredient blend offers a highly effective, comprehensive approach to under-eye care. It targets aging, puffiness, dark circles, and dryness. The peptides and vitamins help firm and brighten, while caffeine depuffs. Palmitoyl Pentapeptide-4 (Matrixyl): A powerful collagen-boosting peptide that helps rebuild skin structure. It visibly smooths fine lines and crow's feet by restoring elasticity. Caffeine: temporarily tightens blood vessels. It is highly effective at reducing under-eye bags and fluid-based puffiness. Vitamin K: Often used to strengthen fragile blood vessels and reduce the pooling of blood that causes purple- or blue-toned dark circles. Vitamin E: antioxidant that protects the delicate eye area from free-radical damage and seals in vital moisture. Green Tea: provides anti-inflammatory and antioxidant benefits. It soothes the skin and protects against environmental stressors. Bisabolol: strictly to soothe and calm the skin. It counteracts irritation and keeps the sensitive eye contour comfortable.	Eye Cream	1% / 0.5% / 0.5% / 1% / 1% / 1%	15 g
NAD+	NAD supports longevity by enhancing cellular energy production, improving DNA repair, and boosting metabolic functions. Injections provide rapid effects, nasal delivery offers quick absorption. Creams target aging skin through direct application.	Cream	0.1	15 g

PRODUCT	KNOWN USES	TYPE	STRENGTH	VOLUME
NEEDLE-LESS EYE-LIFT AM: ACETYL HEXAPEPTIDE-8 / BISABOLOL / VITAMIN K / GREEN TEA / CAFFEINE / VITAMIN E WITH BERGAMOT	These ingredients are commonly formulated into topical eye creams and serums to collectively target the delicate, thin skin around the eyes. They work together to reduce fine lines, combat puffiness, and brighten dark circles. Acetyl Hexapeptide-8: this peptide reduces repetitive muscle contractions. By relaxing these muscles, it helps smooth out crow's feet and expression lines. Caffeine: temporarily tightens blood vessels. It is highly effective at reducing under-eye bags and fluid-based puffiness. Vitamin K: Often used to strengthen fragile blood vessels and reduce the pooling of blood that causes purple- or blue-toned dark circles. Vitamin E: antioxidant that protects the delicate eye area from free-radical damage and seals in vital moisture. Green Tea: provides anti-inflammatory and antioxidant benefits. It soothes the skin and protects against environmental stressors. Bisabolol: strictly to soothe and calm the skin. It counteracts irritation and keeps the sensitive eye contour comfortable. Bergamot: It is highly aromatic and often added to formulas for its refreshing, uplifting scent.	Eye Cream	0.5% / 0.5% / 0.5% / 1% / 1% / 1%	15 g
NIACINAMIDE	Niacinamide brightens skin, improves elasticity, and calms redness. It also reduces pore size, controls oil production, and improves skin barrier function.	Gel	0.04	15 g
PRACASIL SCAR GELS: ALL 4 OPTIONS	PracaSil-Plus (often used as a base for Pracasil scar gels) is a topical silicone and Pracaxi oil compound used to minimize and soften both new and old scars.	Gel	Varies	30
PREMIUM AGELESS CREAM: ACETYL HEXAPEPTIDE-8 / FERULIC ACID / GHK / NAD+ / NIACINIMIDE	These powerful skincare ingredients target aging at a cellular level, improving elasticity, texture, and radiance. They function as anti-wrinkle relaxers, potent antioxidants, and cellular energizers. Acetyl Hexapeptide-8: this peptide reduces repetitive muscle contractions. By relaxing these muscles, it helps smooth out crow's feet and expression lines. Ferulic Acid: protects your skin from daily pollution and sun damage. GHK: A naturally occurring copper peptide that promotes wound healing, stimulates collagen and elastin production, and reduces inflammation. NAD+ boosts skin cell metabolism, support mitochondrial function, and revitalize dull, aging skin. Niacinamide brightens skin, improves elasticity, and calms redness. It also reduces pore size, controls oil production, and improves skin barrier function.	Cream	0.5% / 2% / 0.2% / 1% / 2%	30 g
SCAR REPAIR CREAM: FRESH GHK / GLUTATHIONE / COENZYME-Q10 / PRACASIL	These ingredients are powerful, specialized dermatological compounds often used in custom compounded formulas to maximize skin healing and prevent aging. They work synergistically to reduce inflammation, promote collagen production, and protect the skin barrier. GHK: A naturally occurring copper peptide that promotes wound healing, stimulates collagen and elastin production, and reduces inflammation. Glutathione reduces oxidative stress, enhancing detoxification, and promoting cellular health. CoQ10 (Coenzyme Q10): protects against cellular oxidation and photoaging. As natural CoQ10 levels decline with age, topical application helps diminish the depth of wrinkles (like "crow's feet") and improves overall skin elasticity. PracaSil-Plus (often used as a base for Pracasil scar gels) is a topical silicone and Pracaxi oil compound used to minimize and soften both new and old scars.	Cream	0.5% / 10% / 1% / 10%	20 g
SPIRONOLACTONE (COMMERCIAL PRODUCT)	Spironolactone is primarily used to treat adult female hormonal acne. It works as an anti-androgen by blocking the effects of hormones that trigger excess oil (sebum) production in the skin. It addresses hormonal fluctuations systemically.	Tablet	25 mg	60
SPIRONOLACTONE (COMMERCIAL PRODUCT)	Spironolactone is primarily used to treat adult female hormonal acne. It works as an anti-androgen by blocking the effects of hormones that trigger excess oil (sebum) production in the skin. It addresses hormonal fluctuations systemically.	Tablet	50 mg	60
SPIRONOLACTONE (COMMERCIAL PRODUCT)	Spironolactone is primarily used to treat adult female hormonal acne. It works as an anti-androgen by blocking the effects of hormones that trigger excess oil (sebum) production in the skin. It addresses hormonal fluctuations systemically.	Tablet	100 mg	60
SPIRONOLACTONE / DEXAMETHASONE	Spironolactone and dexamethasone are sometimes prescribed together in dermatology specifically in the form of low-dose oral medications—to treat severe, treatment-resistant hormonal acne. This combination targets both the root hormonal causes of breakouts and the subsequent inflammation.	Tablet	25 / 4	each
TRETINOIN / CO Q10	Tretinoin is a prescription-strength retinoid that boosts cell turnover and stimulates collagen to treat acne, smooth wrinkles, and fade dark spots. Co Q10 (Coenzyme Q10) is an antioxidant that energizes skin cells and protects against environmental damage. Together, they offer a powerful combination for anti-aging and skin repair.	Cream	0.025% / 1%	15 g

PRODUCT	KNOWN USES	TYPE	STRENGTH	VOLUME
VITAMIN C PLUMPING SERUM: ASCORBIC ACID 20% / SODIUM HYALURONATE 1% / PALMITOYL PENTAPEPTIDE-4 / ESTRIOL 0.5% IN VITAMIN E SERUM BASE	This powerful, multi-active serum is a specialized anti-aging treatment designed to deeply hydrate, stimulate collagen production, and restore structural integrity to aging skin. It is frequently used by women in perimenopause or menopause to counteract hormonal skin thinning and dryness. Ascorbic Acid (Vitamin C): A powerful antioxidant that neutralizes free radicals, brightens the complexion, and fades hyperpigmentation. It also acts as a vital cofactor in collagen biosynthesis, making it a staple for maintaining skin firmness. Palmitoyl Pentapeptide-4 (Matrixyl): A powerful collagen-boosting peptide that helps rebuild skin structure. It visibly smooths fine lines and crow's feet by restoring elasticity. Sodium Hyaluronate (1%): penetrates deeply to draw moisture into the skin. It plumps the epidermis, smoothing out fine lines and counteracting the drying effects of high-percentage Vitamin C. Estriol (0.5%): A gentle, low-potency form of estrogen, it works locally to boost dermal thickness, plumpness, and hydration—reversing the natural collagen loss that occurs as estrogen levels drop during menopause. Vitamin E Serum Base: an antioxidant that nourishes the skin barrier and works synergistically with Vitamin C to double the formula's photoprotection against environmental damage.	Serum	20% / 1% / 1% / 0.5% / 0.5%	15 mL

HAIR LOSS

Our personalized Hair Restoration therapies offer a multi-faceted approach to combat thinning and promote sustainable growth. By utilizing targeted treatments that reduce local DHT and inflammation, our formulations work to halt the progression of hair loss while actively stimulating dormant follicles and thickening miniaturized hairs. From customized medical therapies to safe, minimally invasive options, we tailor each regimen to enhance overall density, restore natural thickness, and achieve optimal, lasting results.

HAIR LOSS PRODUCT OFFERINGS

PRODUCT	KNOWN USES	TYPE	STRENGTH	VOLUME
BIOTIN / FINASTERIDE	Biotin and finasteride use fundamentally different mechanisms for hair growth. Finasteride treats the hormonal root cause of hair loss by blocking the conversion of testosterone to DHT, which shrinks follicles. Biotin (Vitamin B7) supports hair health by providing the building blocks for keratin, the protein that makes up hair strands.	Capsule	5 mg / 1 mg	each
DANDRUFF SHAMPOO: KETOCONAZOLE / PYRITHIONE ZINC / FLUCINONIDE / TEA TREE OIL	These ingredients target dandruff by tackling different root causes—primarily fungal overgrowth (Malassezia yeast) and scalp inflammation. Ketoconazole: binds to the proteins in your hair and scalp to directly destroy the cellular structure of fungi causing severe dandruff and seborrheic dermatitis. It also possesses natural anti-inflammatory properties. Pyrithione Zinc targets dandruff-causing yeast, regulates the production of irritants (like oleic acid), and slows down the shedding of flaky skin cells. Fluocinonide Suppresses immune responses on the scalp. It quickly stops intense itching, redness, flaking, and severe inflammation associated with scalp flare-ups. Tea Tree Oil: it is recognized for its germ-fighting, mild antibacterial, and antifungal properties. It helps soothe an itchy scalp and cuts down on inflammation.	Shampoo	2% / 1% / 0.1% / 0.5%	120 mL
FINASTERIDE	Finasteride promotes hair growth by blocking the enzyme that converts testosterone into dihydrotestosterone (DHT)—the hormone responsible for shrinking hair follicles in male pattern baldness. It allows hair follicles to regain their normal size and grow thicker hair.	Tablet	1 mg	each
FINASTERIDE	Finasteride promotes hair growth by blocking the enzyme that converts testosterone into dihydrotestosterone (DHT)—the hormone responsible for shrinking hair follicles in male pattern baldness. It allows hair follicles to regain their normal size and grow thicker hair.	Tablet	5 mg / 1 mg	each
GHK-CU	GHK-Cu is used for hair loss. It can stimulate hair growth, strengthen hair follicles, and improve scalp health by promoting collagen production, reducing inflammation, and repairing damaged skin, potentially leading to thicker, healthier hair.	Dropper / Spray	5 mg / mL	30 mL
GHK-CU	GHK-Cu is used for hair loss. It can stimulate hair growth, strengthen hair follicles, and improve scalp health by promoting collagen production, reducing inflammation, and repairing damaged skin, potentially leading to thicker, healthier hair.	Foam	5 mg / mL	50 mL
HAIR FOAM: GHK-CU / ZINC-THYMULIN / BIMATAPROST / BIOTIN	These four ingredients are utilized in specialized hair-loss treatments, ranging from compounded topicals to vitamin supplements. They work through different pathways to stimulate hair follicles, reduce shedding, and support keratin production. GHK-Cu (Copper Peptide): stimulates angiogenesis (formation of new blood vessels) to increase blood flow and oxygen to the follicle. It also enlarges shrunken follicles and encourages dormant hairs to re-enter the anagen (growth) phase. Zinc-Thymulin: reduces scalp micro-inflammation and regulate immune signaling. By calming inflammatory responses that trigger premature follicle regression, it helps keep the follicle in the growth phase. Bimatoprost: works by interacting with prostaglandin receptors in the hair follicle, extending the growth phase, and initiating growth in resting (telogen) follicles. Biotin (Vitamin B7): supports hair health by providing the building blocks for keratin, the protein that makes up hair strands.	Foam	5 mg / 50 mcg / 0.1 mg / 1 mg	50 mL

PRODUCT	KNOWN USES	TYPE	STRENGTH	VOLUME
HAIR LOSS PREVENTION CAPS: MINOXIDIL	Minoxidil: stimulates hair growth, enhances scalp circulation, and effectively treats hair loss.	Capsule	0.5 mg	30
HAIR SUPPORT CAPS: BIOTIN / SAW PALMETTO	Biotin and saw palmetto are commonly paired in hair growth supplements, but they work in completely different ways. Saw palmetto acts as a hormone regulator to block hair loss, while biotin supports the structural integrity and health of the hair. Saw Palmetto: helps protect follicles and stabilize hair loss. Biotin (Vitamin B7): supports hair health by providing the building blocks for keratin, the protein that makes up hair strands.	Capsule	10 mg / 160 mg	30
MINOXIDIL / GHK-CU	Minoxidil: stimulates hair growth, enhances scalp circulation, and effectively treats hair loss. GHK-Cu is used for hair loss. It can stimulate hair growth, strengthen hair follicles, and improve scalp health by promoting collagen production, reducing inflammation, and repairing damaged skin, potentially leading to thicker, healthier hair.	Foam	5 / 0.5	50 mL
MINOXIDIL / KETOCONAZOLE / LATANOPROST	These three medications are often combined into a single, custom-compounded topical formula to treat hair loss (like androgenetic alopecia) from multiple biological angles. Minoxidil: stimulates hair growth, enhances scalp circulation, and effectively treats hair loss. Ketoconazole: reduces scalp inflammation. Helps prevent hair follicle shrinkage. Latanoprost: stimulates hair growth directly. It helps extend the hair growth phase and promotes the transition of thin, "peach fuzz" vellus hairs into thicker, pigmented terminal hairs.	Solution / Lotion	10 / 2 / 0.06	30 mL
MINOXIDIL / KETOCONAZOLE / LATANOPROST / FINASTERIDE	These four medications target hair loss (like androgenetic alopecia). Minoxidil: stimulates hair growth, enhances scalp circulation, and effectively treats hair loss. Ketoconazole: reduces scalp inflammation. Helps prevent hair follicle shrinkage. Latanoprost: stimulates hair growth directly. It helps extend the hair growth phase and promotes the transition of thin, "peach fuzz" vellus hairs into thicker, pigmented terminal hairs. Finasteride: increase blood flow to follicles and lengthens the anagen (growth) phase and enlarges miniaturized hairs.	Lotion	5 / 2 / 0.003 / 0.1	30 mL
MINOXIDIL / LATANOPROST	Minoxidil: stimulates hair growth, enhances scalp circulation, and effectively treats hair loss. Latanoprost: stimulates hair growth directly. It helps extend the hair growth phase and promotes the transition of thin, "peach fuzz" vellus hairs into thicker, pigmented terminal hairs.	Lotion	10 / 0.06	30 mL
MINOXIDIL / TRETINOIN / PROGESTERONE / FINASTERIDE	These four medications target hair loss (like androgenetic alopecia). Minoxidil: stimulates hair growth, enhances scalp circulation, and effectively treats hair loss. Tretinoin: acts as a penetration enhancer. It increases the activity of the scalp enzyme that converts minoxidil into its active form, making minoxidil significantly more effective, especially for "non-responders. Progesterone: A hormone that acts as a mild anti-androgen. When applied to the scalp, it can help block the conversion of testosterone into stronger androgens that shrink hair follicles. Finasteride: increases blood flow to follicles and lengthens the anagen (growth) phase and enlarges miniaturized hairs.	Solution	5 / 0.025 / 0.25 / 0.1	50 mL
PREMIUM HAIR FOAM: GHK-CU / ZINC-THYMULIN / BIMATOPROST / BIOTIN / FINASTERIDE / MELATONIN	GHK-Cu is used for hair loss. It can stimulate hair growth, strengthen hair follicles, and improve scalp health by promoting collagen production, reducing inflammation, and repairing damaged skin, potentially leading to thicker, healthier hair. Zinc-Thymulin: reduces scalp micro-inflammation and regulate immune signaling. By calming inflammatory responses that trigger premature follicle regression, it helps keep the follicle in the growth phase. Bimatoprost: works by interacting with prostaglandin receptors in the hair follicle, extending the growth phase, and initiating growth in resting (telogen) follicles. Biotin (Vitamin B7): supports hair health by providing the building blocks for keratin, the protein that makes up hair strands. Finasteride: increases blood flow to follicles and lengthens the anagen (growth) phase and enlarges miniaturized hairs. Melatonin: helps neutralize oxidative stress in hair follicles and it can also extend the anagen growth phase and delay premature shedding.	Foam	5 mg / 50 mcg / 0.1 mg / 1 mg / 1 mg / 1 mg	50 mL
PRETREATMENT SPRAY: SALICYLIC ACID/ PANTHENOL	Salicylic acid and Panthenol (pro-vitamin B5) have complementary roles in skincare. Salicylic acid unclogs pores and exfoliates, while Panthenol deeply hydrates and soothes irritation. They are frequently formulated together to create an effective acne-fighting regimen that minimizes dryness and redness.	Spray	2% / 0.5%	30 mL
PTD-DPM / VALPORIC ACID	PTD-DBM (Protein Transduction Domain-Dishevelled Binding Motif) and Valproic Acid (VPA) are primarily used topically in dermatology for hair restoration and wound healing. Together, they stimulate hair follicle development and stem cell regeneration.	Topical Spray	0.003 / 5%	30
TOPICAL FINASTERIDE / FOAM FINASTERIDE	Finasteride: increases blood flow to follicles and lengthens the anagen (growth) phase and enlarges miniaturized hairs.	Foam	0.001	50 mL

PRODUCT	KNOWN USES	TYPE	STRENGTH	VOLUME
TOPICAL MELATONIN / FOAM MELATONIN	Topical and foam melatonin are used in skincare as potent, restorative antioxidants designed to neutralize free radicals, defend against UV damage, and stimulate overnight cellular repair	Foam	0.0014	50mL
ZINC-THYMULIN / GHK-CU	ZINC-THYMULIN and GHK-CU are specialized peptides that function synergistically to repair, regenerate, and protect the skin and scalp. GHK-Cu is used for hair loss. It can stimulate hair growth, strengthen hair follicles, and improve scalp health by promoting collagen production, reducing inflammation, and repairing damaged skin, potentially leading to thicker, healthier hair. Zinc-Thymulin: reduces scalp micro-inflammation and regulate immune signaling. By calming inflammatory responses that trigger premature follicle regression, it helps keep the follicle in the growth phase.	Topical Spray	0.001 / 0.5	25 mL
ZINC-THYMULIN / GHK-CU	ZINC-THYMULIN and GHK-CU are specialized peptides that function synergistically to repair, regenerate, and protect the skin and scalp. GHK-Cu is used for hair loss. It can stimulate hair growth, strengthen hair follicles, and improve scalp health by promoting collagen production, reducing inflammation, and repairing damaged skin, potentially leading to thicker, healthier hair. Zinc-Thymulin: reduces scalp micro-inflammation and regulate immune signaling. By calming inflammatory responses that trigger premature follicle regression, it helps keep the follicle in the growth phase.	Dropper / Spray	50 mcg / 5 mg / mL	30 mL
ZINC-THYMULIN / GHK-CU	ZINC-THYMULIN and GHK-CU are specialized peptides that function synergistically to repair, regenerate, and protect the skin and scalp. GHK-Cu is used for hair loss. It can stimulate hair growth, strengthen hair follicles, and improve scalp health by promoting collagen production, reducing inflammation, and repairing damaged skin, potentially leading to thicker, healthier hair. Zinc-Thymulin: reduces scalp micro-inflammation and regulate immune signaling. By calming inflammatory responses that trigger premature follicle regression, it helps keep the follicle in the growth phase.	Foam	50 mcg / 5 mg / mL	50 mL
ZINC-THYMULIN	ZINC-THYMULIN is used topically in anti-aging, acne, and scalp care formulations. It helps calm inflammation, protect against environmental stressors, and is often blended with hydrating serums to support hair follicle health and stimulate growth.	Topical Spray	0.001	25 mL
ZINC-THYMULIN	ZINC-THYMULIN is used topically in anti-aging, acne, and scalp care formulations. It helps calm inflammation, protect against environmental stressors, and is often blended with hydrating serums to support hair follicle health and stimulate growth.	Dropper / Spray	50 mcg / mL	30 mL
ZINC-THYMULIN	ZINC-THYMULIN is used topically in anti-aging, acne, and scalp care formulations. It helps calm inflammation, protect against environmental stressors, and is often blended with hydrating serums to support hair follicle health and stimulate growth.	Foam	50 mcg / mL	50 mL

ANTI-AGING / LONGEVITY

Our Anti-Aging and Longevity treatments go beyond surface-level care to address the biological drivers of aging. By focusing on cellular rejuvenation, mitochondrial health, and metabolic optimization, these personalized protocols are designed to extend your 'healthspan'—the years spent in peak physical and cognitive condition. From advanced NAD+ therapies and antioxidant infusions to innovative senolytic compounds, each regimen is tailored to reduce systemic inflammation and help you maintain a youthful resilience at every stage of life.

ANTI-AGING PRODUCT OFFERINGS

PRODUCT	KNOWN USES	TYPE	STRENGTH	VOLUME
BORIC ACID	Boric acid is primarily incorporated into anti-aging and skincare products for its stabilizing properties and antioxidant benefits, which help protect the skin from damage caused by free radicals. Ensures that cosmetic formulations remain active and uncontaminated over time. Suppresses oxidative stress and reduces inflammation, which in turn helps maintain skin elasticity.	Capsule	600 mg	30
SIROLIMUS (RAPAMYCIN)	Sirolimus (also known as rapamycin) is used off-label in longevity medicine to delay age-related cellular decline by inhibiting mTOR (Mechanistic Target of Rapamycin), a pathway that controls cell growth and metabolism. It also suppresses age-related chronic inflammation.	Capsule	0.5 mg	each
AGELESS CAPSULES: MSM / NAC / IDEBENONE / RESVERATROL	MSM, NAC, Idebenone, and Resveratrol are targeted for anti-aging because they combat oxidative stress, cellular damage, and mitochondrial dysfunction—primary hallmarks of aging. MSM (Methylsulfonylmethane): acts as a vital building block for collagen and keratin. Clinical trials show significantly reduces wrinkles, improves skin texture, and enhances skin hydration. NAC (N-acetylcysteine): has been shown to reverse characteristic aging hallmarks, restoring mitochondrial function, lowering systemic inflammation, and improving muscle strength. Idebenone: used topically to repair photoaging damage, neutralize free radicals caused by UV rays, and reduce collagen and elastin breakdown. Resveratrol: It promotes DNA repair, enhances mitochondrial biogenesis, and alleviates UVA-induced photoaging.	Capsule	150 mg / 150 mg / 50 mg / 50 mg	60
NAD+	NAD supports longevity by enhancing cellular energy production, improving DNA repair, and boosting metabolic functions. Injections provide rapid effects, nasal delivery offers quick absorption. Creams target aging skin through direct application.	Cream	0.1	15 g

INFECTIOUS DISEASES / PARASITOLOGY

Our Anti-Aging and Longevity treatments go beyond surface-level care to address the biological drivers of aging. By focusing on cellular rejuvenation, mitochondrial health, and metabolic optimization, these personalized protocols are designed to extend your 'healthspan'—the years spent in peak physical and cognitive condition. From advanced NAD+ therapies and antioxidant infusions to innovative senolytic compounds, each regimen is tailored to reduce systemic inflammation and help you maintain a youthful resilience at every stage of life.

INFECTIOUS DISEASES / PARASITOLOGY PRODUCT OFFERINGS

PRODUCT	KNOWN USES	TYPE	STRENGTH	VOLUME
IVERMECTIN	Ivermectin is a broad-spectrum anti-parasitic medication approved by the FDA for the treatment of certain parasitic infections in humans and animals. It belongs to a class of drugs known as anthelmintics and works by paralyzing and killing parasitic worms and insects.	Capsule	3 mg	each
IVERMECTIN	Ivermectin is a broad-spectrum anti-parasitic medication approved by the FDA for the treatment of certain parasitic infections in humans and animals. It belongs to a class of drugs known as anthelmintics and works by paralyzing and killing parasitic worms and insects.	Capsule	6 mg	10
